EDUCATION

University of Oxford

DPhil (PhD) Political Science

2021 – 2025

- Thesis uses high resolution electoral and demographic data, observational and experimental data to model neighbourhood-level voting using causal inference techniques. Supervised by Prof. James Tilley
- Designed and fielded original surveys (incl. conjoint experiments) using Qualtrics and Javascript/HTML tools. Secured over £20,000 in external funding
- Methods training: courses in experimental and quasi-experimental design, demography, time series, MRP, qualitative interviews and machine learning
- Specialised in survey methods, bias correction and sampling design

Harvard University

Visiting Fellow (PhD student), Dept of Government

2024 – 2025

- Grade: 4.0 GPA. Completed coursework in predictive modelling, multilevel analysis, research design, and data engineering
- Sponsored by Prof. Ryan Enos; presented to departmental workshops on political methodology and spatial data

London School of Economics

MSc (Hons) Comparative Government

2019 – 2020

- Completed coursework in public and social policy, and panel data methods. Applied longitudinal analysis to European electoral data as part of final dissertation project
- Grade: Distinction. Supervised by Prof. Sara Hobolt

University of York

BA (Hons) Philosophy, Politics and Economics

2016 – 2019

- Grade: 2:1[69]. Final thesis on the social determinants of inequality

EMPLOYMENT

BBC

London

Elections Analyst

2024 and 2025

- Delivered real-time analysis for the 2024 and 2025 local and general election night programmes, supporting on-air reporting in a high-pressure live environment
- Produced the 2024 election exit poll as part of a small team, the most accurate ever

Hertford College and Jesus College, Oxford

Oxford

Lecturer in Politics

2023 – 2025

- Taught R methods labs to 100 undergraduate students for a 'Political Analysis' course
- Gave lectures to 300 final-year undergraduate students on 'Political Sociology'

United Nations Development Programme

Oxford

Report Author

2023 – 2024

- Developed and validated survey instruments and analytical models for a UN climate report, in an international team, based on the largest ever poll of global climate opinions. Collaborated on building weights for the final data
- Co-authored the final report (see Publications); contributed to publicising it to global media, including articles and interviews

LSE British Politics and Policy

Remote

Writer

2022 – 2023

- Authored four articles on public opinion with average readership of 3,000+ for the UK's most-read public policy website. Gave interviews to national broadcasters

Department of Politics and International Relations, Uni of Oxford

Oxford

Research Assistant

2021 – 2022

- Fielded original surveys, and applied multilevel and fixed effects models to predict neighbourhood-level political polarisation, as part of a £400,000 UK Government-funded project
- Contributed modelling and methodological guidance for a forthcoming book on polarisation, under contract with Oxford University Press

House of Commons

London

Parliamentary Researcher

Feb – Dec 2020

- Led and co-wrote a report on voting behaviour in the 2019 election for senior MPs, using longitudinal constituency-level economic data and conducting interviews with voters and party members, reported in national newspapers

SELECTED PUBLICATIONS

2025. Regional spending does not affect support for the European Union. Journal of European Public Policy (w/ James Tilley and Sara Hobolt)

2024. Peoples' Climate Vote 2024. New York: United Nations Development Programme (w/ Steve Fisher and others)

2024. Reproduction and Robustness of Kao et al. (2024): 'Female Representation and Legitimacy'. Report from UC Berkeley Replication Scheme (w/ Tom Brailey and others)

TECHNICAL SKILLS

Programming languages and tools: R (tidyverse, rmarkdown, survey, glmnet, rvest), Python (pandas, numpy, jupyter, sklearn), Javascript (Qualtrics, surveys), STATA, SPSS

Design and visualisation: HTML/CSS, GIS (ArcGIS and QGIS), Adobe Creative Suite, L^AT_EX
